Shrewsberry & Associates Celebrates 20 Years of Engineering Excellence

INDIANAPOLIS, IN – Shrewsberry & Associates, LLC, a premier DBE/MBE engineering and consulting firm, is celebrating its 20-year anniversary on September 1, 2021. What began in 2001 as a small engineering and environmental consulting firm founded by William “Bill” Shrewsberry with just five members and an office in Indianapolis, Shrewsberry has grown significantly in capacity and geographical reach across the United States.

Shrewsberry has provided quality engineering, environmental, landscape architecture, and construction services to many high-profile projects including: Indianapolis Midfield Terminal (Indiana), Lucas Oil Stadium (Indiana), Indianapolis Cultural Trail (Indiana), Eskenazi Hospital (Indiana), Indianapolis Deep Rock Tunnel (Indiana), Denver International Airport Hotel & Transit Center (Colorado), New Orleans International Airport (Louisiana), State Street Corridor (Indiana), Transform 66 - Outside the Beltway (Virginia). Currently, the firm is providing services at: 16 Tech Innovation District (Indiana), Bankers Life Fieldhouse Plaza Expansion (Indiana), Clean Rivers Program (Washington, D.C.), Indianapolis Community Justice Campus (Indiana), Central 70 Design-Build (Colorado), and many other client locations.

“This is an incredible milestone for Shrewsberry,” Anthony Warren, President & CEO said. “Our firm has achieved its success through the hard work, passion and dedication of all our team members. We strive for excellence in everything we do: from design to construction services, to administration. Our aim is to be the best and always strive to exceed the expectations of our clients every time. We have dedicated ourselves for 20 years to client-focused services and high integrity to provide communities, where we live and work, with the highest quality solutions and services.”

“To this day, Shrewsberry is driven by the spirit of our founding, which has enabled us to expand our portfolio of offerings,” said Eric Rolle, Vice President of West Operations, who has been with the company for 18 years. “Shrewsberry’s strategy of establishing and developing core business areas to address the changing infrastructure needs across the country has enabled us to foster a culture of innovation and engineering excellence.”

The vision for the company 20 years ago was about more than providing quality engineering solutions. It was to build a culture to create opportunities for a diverse group of professionals to be trained and mentored, while nurturing relationships with community organizations, trade associations and other program providers who share the same commitment to diversity. Today, Shrewsberry still holds those same values at its core. Its leadership has maintained a diverse workforce of highly qualified individuals and has been actively involved with organizations such as the Architecture Construction Engineering (ACE) Mentor Program, providing mentors and scholarships for high school students interested in the industry. Shrewsberry’s Vision Statement clearly identifies its corporate attitude and commitment to embracing diversity.
